SUMMARY

Aspiring Frontend Developer with hands-on experience building interactive web applications using HTML, CSS, JavaScript, and React, with experience in API integration, dynamic routing, and Git-based development.

EDUCATION

B.S. Business Administration

Biola University, Torrey Honors Institute

Computer Science Proficiency Certification

Frontend Simplified

Expected 2026

EXPERIENCE

Frontend Developer Intern

Frontend Simplified

2026 – Current

Remote

- Transform static HTML, CSS, JavaScript, and React applications into interactive user interfaces using animations, transitions, and carousels.
- Process API requests to dynamically retrieve and display data from cloud servers, implementing skeleton loading states, pagination, and dynamic routing.
- Utilize Git version control and GitHub to collaborate with a virtual development team through a shared software development workflow.

Recruitment Consultant

Sermor Partners

September 2024 – February 2025

Remote

- Managed a full recruiting desk within the Consumer Products industry, generating \$69.9K in revenue through successful placements.
- Secured new relationships with clients and candidates while managing competing priorities in a fast-paced, deadline-driven environment.

Recruiter

Health Advocates Network

July 2023 – August 2024

Covina, CA

- Managed full-cycle recruiting for healthcare and administration professionals across multiple states in a high-volume staffing environment.
- Utilized applicant tracking systems, Boolean search, resume screening, interviewing, and scheduling to manage candidates from initial contact through placement.

Recruiting Coordinator

Meta

August 2021 – January 2023

Remote

- Coordinated a high volume of interviews for Meta's Machine Learning team.
- Partnered with directors and VP-level stakeholders to prioritize candidates and maintain an efficient interview process.
- Served as a point of contact for scheduling-tool changes and contributed to standardizing recruiting processes.

Senior HR Assistant

Amazon

July 2020 – July 2021

Moreno Valley, CA

- Provided HR support onsite while managing multiple competing priorities in a fast-paced environment.
- Created and analyzed reports, supported onboarding, and maintained HR systems and documentation.
- Conducted interviews, investigations, compliance audits, and other time-sensitive HR processes.

PROJECTS - [Portfolio](#)

Movie Search Application - HTML, CSS, JS, React

- Created a media search application with dedicated home, search results, and movie details views.
- Integrated the OMDb API using Axios to dynamically retrieve movie search results and individual movie details.
- Implemented React Router navigation and URL search parameters to support navigation between search results and individual movie pages.
- Built reusable React components and implemented loading states, sorting functionality, and responsive layouts to improve the user experience.

Online Bookstore Application - HTML, CSS, JS, React

- Created a faux bookstore with multiple pages and dynamic routing, including a cart and checkout feature.
- Built reusable React components and implemented loading states, sorting functionality, and responsive layouts to improve the user experience.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript

Framework: React

Libraries & Tools: React Router, Axios, Git, GitHub

Frontend: API Integration, Dynamic Routing, Responsive Design, Loading States, Third-Party Libraries

Development Practices: Git Branching, Merging, Pull Requests
